

Julian Resources Provides Exploration Update and AGM Results

Vancouver, British Columbia, Canada – September 11, 2018 - Julian Resources Inc. (“Julian” or the “Company”) (TSX-V: JLR) is pleased to provide an update of exploration activities at its 100% owned Big Kidd property located in Aspen Grove, BC (the “Property”). Julian has recently completed a Phase I work program which included a high-resolution (25m line-spacing) ground magnetic survey (Figure 1) centered over the Big Kidd Breccia Zone, an alkalic porphyry target drilled most recently drilled in 2012, which has significant historical intercepts of 62m of 0.95g/t Au, 0.12% Cu (Hole 97-04) and 116m of 0.79g/t Au, 0.12% Cu (DDH 97-05).

Figure 1 - high-resolution (25m line-spacing) ground magnetic survey centered over the Big Kidd Breccia Zone

A volcanic-intrusive complex is located on the Property, centered on the Big Kidd Breccia Zone, near the triple junction of three major regional faults. The 2018 magnetic survey imagery confirms and greatly enhances the known geometry of the fault intersection and other nearby subsurface features. Notably, the intersection is directly up ice from a 2km long copper - gold soil anomaly (up to 2005 ppm Cu, 395 ppb Au).

A 500 meter-wide structurally complex moderate magnetic low is seen directly west of the fault intersection. The magnetic feature is located underneath mapped mineralized breccia outcrops and has been interpreted as the subsurface signature of the Big Kidd Breccia Zone. The magnetic signature is thought to be caused by magnetite destructive alteration / brecciation of the host rock and the emplacement of copper gold mineralization. Additional target areas to the north and south, with similar magnetic signatures, have also been identified.

The magnetic data will be used to plan a Phase II late-2018 drill program to test depth and lateral continuity at the Big Kidd Breccia Zone. Jiulian recently completed a fully subscribed \$1,000,000 financing, which will be used to fund the late season drill program.

Annual General Meeting

At Jiulian's annual general meeting of shareholders held on August 27, 2018 (the "Meeting"), Xiaolin (Charlie) Cheng, Nanmao Su and Sheng (Sam) Wang were re-elected to the Board of Directors. In addition, the shareholders elected Scott Dorion, Oliver Friesen, Ed Milewski and Terese Gieselman as new directors of the Company. The shareholders also passed all other resolutions put forward at the Meeting, including an ordinary resolution to ratify and approve the Company's existing stock option plan, pursuant to which the Company may grant stock options up to 10 percent of its issued and outstanding common shares at the time of grant.

Thea Koshman and Paul Sorbara did not stand for re-election at the Meeting. Management would like to thank Ms. Koshman and Mr. Sorbara for their contributions during the time of their directorships and we wish them well in their future endeavors.

Mr. Milewski graduated from University of Windsor with B.Comm in 1973. He obtained his CA designation in 1976 and has worked as a financial advisor with various investment firms for 35 years. He established a professional consulting firm, ERM Consulting in 2012 which provides independent advice to public small cap companies across Canada.

Ms. Gieselman has had 32 years' experience with junior mining and exploration companies listed on the TSX, TSX-Venture Exchange, OTCBB, NASDAQ and AMEX, in the roles of Chief Financial Officer, Treasurer and Corporate Secretary. During her tenure in the resource sector, she has accumulated an extensive background in corporate and financial reporting and compliance for Canada and the United States, including particularly relevant experience in financings, treasury, international corporate structures and financial reporting in Mexico, Peru, Chile, Argentina, Mozambique, Kenya and Zimbabwe.

Mr. Dorion graduated from the University of Alberta in 2010 with a Bachelor of Science in Geology. With over a decade of exposure to the mineral exploration industry, Mr. Dorion has been involved in each phase of pre-mine development from early stage grassroots to advanced feasibility. Mr. Dorion has worked in Canada and Australia, with focus on gold, silver, copper, and zinc projects.

Mr. Friesen holds a B.Sc (Hons.) degree in geology from University of British Columbia and a M.Sc degree focusing in sedimentology from Simon Fraser University. He has been actively involved in mineral exploration since 2010. He has worked on a number of precious and base metal projects throughout Nevada, British Columbia, and the Yukon.

Qualified Person

Technical information in this news release has been reviewed and approved by Dr. Gerry Carlson, P. Geo. who is a Qualified Person within the meaning of National Instrument 43-101.

About Jiulian Resources Inc.

Jiulian is a junior exploration public company based in Vancouver, BC engaged in the acquisition and exploration of mineral properties that have potential of containing metals with strong market demand. The Company's management team consists of an experienced geologist, mining engineer, accountant and businessman who have proven successful records.
